

Background on the transparency report

The information below will help provide some background to the expenditure outlined in the transparency report, explaining how and why expenditure occurs.

Subsistence

Food, drink and accommodation-related spend is considered a reasonable and expected expenditure for a fire and rescue service. For example, purchasing food and drink for crews attending large and ongoing incidents.

Firefighters and staff regularly attend training courses and events outside of the Greater Manchester area, and policy allows purchase cards to be used to pay for meals when away from home.

GMFRS also runs a number of Prince's Trust courses throughout the year. Food and drink is provided for attendees, which is often paid for using purchase cards. This is in line with current purchase card guidance.

In relation to the July-September 2018 purchase card expenditure, it should be noted that during the first three weeks of July the fire service dealt with the ongoing and unprecedented moor fires in Tameside and Bolton. This involved a huge amount of resources and people from across Greater Manchester, other fire and rescue services and other agencies including the armed forces and Environment Agency. These were exceptional circumstances for GMFRS and as a result, purchase cards were used during this period to pay for refreshments, hot meals, overnight accommodation and also additional equipment, such as freezers and vehicle hire to transport equipment around the city-region.

Responsive repairs and maintenance

The Estates team carries out repairs and maintenance across the GMFRS property portfolio. Due to the nature of the work equipment and products are often purchased on an ad hoc basis using a purchase card. This is in line with current purchase card guidance.

The Estates team has also been working with Trafford Council to install aids and adaptations in residents' homes, as part of a pilot to reduce demand on the NHS. This has involved purchases at local DIY superstores. We are currently exploring the option of using trade accounts, instead of using the purchase card.

Public Transport

Since GMFRS transitioned into the GMCA in May 2018, there has been an increase in the number of public transport fares and car parking fees. This is because a number of employees, currently contracted to GMFRS HQ as a place of work, attend regular meetings at or work from GMCA HQ in Manchester. This is in line with the organisation's transport policy.

Within this section, there are also some train fares and bookings which are in line with the existing purchase card guidance.

Professional Fees

The majority of these relate to Land Registry charges to allow the prevention and protection team to carry out checks on businesses or land following a fire/incident.

Periodicals & Magazines

Some of the transactions under this category relate to subscription charges for journals and accreditations.

There are a number of purchases from Amazon which include items such as cables, chargers and small ICT related items. We are exploring the use of a trade account for future purchases to minimise the use of purchase cards.

Purchase card guidance

Purchase card approvals and processes are continuously reviewed and guidance is currently being updated, alongside a revised expenses policy. This will include clearly defining the acceptable use of purchase cards and taking action if guidance is not adhered to.
